METHODOLOGICAL ASPECTS OF MODERN RECREATIONAL GEOGRAPHY

The article aims to solve the problems of modern recreational geography on the basis of clearly defined methodological aspects of its scientific apparatus.

The solution of the set goal was made possible by analyzing the scientific sources from the disturbed problem, which made it possible to clarify the essence of the concept of "recreational geography", its "object" and "subject"; description of geographical processes and phenomena, in particular in recreational geography.

The novelty of the work was the generalization of the scientists' vision of the scientific apparatus of recreational geography, which contributed to its effectiveness: the task of recreational geography and the vectors of their solution were determined.

Practical significance: the article can become an element of the lectures of the discipline for future teachers of geography, as their professional activity is associated with such a component of the educational process as the organization of recreation and improvement of the growing generations.

Key words: recreational geography, methodological aspects, object, subject and tasks of recreational geography.
