*EXPERIENCE OF DENMARK IN THE DEVELOPMENT OF CYCLING TOURISM IN
UZHHOROD*

Aim. The aim of the article is to determine the place of cycling tourism in the system of sports and health tourism and to reveal its essence and infrastructural maintenance in Uzhhorod.

□□□□□□ *Research Methods.* The scientific and special methods of research, including the methods of observation, comparison, analysis, synthesis and sociological survey have been used in the article.

Results. The experience of the capital of Denmark Copenhagen concerning the peculiarities of cycling infrastructure development and the possibility of its use in Uzhhorod (Transcarpathian region) has been analyzed. The current state of cycling tourism, the problems and prospects for its organization have been analyzed. A sociological survey has been carried out on the basis of which the recommendations concerning the potential possibilities and threats for the development of cycling tourism on the investigated territory have been developed.

□□□□□□□□ *Scientific Novelty.* Using foreign experience and a system approach to the organizing cycling infrastructure with the combination of modern spatial structure and conservation of medieval planning, new approaches to the organization of cycling infrastructure of cities have been proposed, and a project for the creation of cycling infrastructure in Uzhhorod has been developed as well.

Practical Significance. Considering the peculiarities of the development and spatial organization of Uzhhorod on the basis of the analysis of experience and practical achievements of Copenhagen in the creation of cycling infrastructure it makes possible to avoid a number of wrong decisions and offer a modern project for the development of the cycling infrastructure within the territory of Uzhhorod. The project also takes into account the requirements laid down in the Cycling Infrastructure Development Program of Uzhhorod for 2016-2020.

Key words: cycling tourism, tourism infrastructure, elements of cycling tourism

infrastructure, cycling route.
