RECREATIONAL POTENTIAL OF KYIV

Objective: the analysis of modern state, problems and prospects of the use of Kyiv recreational

potential, features of forming of recreational environment in different city districts.

Methodology: collection, analysis and generalization of information and statistical data in relation to the use of Kyiv recreational potential.

Results: data regarding modern state, problems and prospects of the use of Kyiv natural recreational potential have been collected; possibilities of forming of recreational environment in city have been shown; main landscape-recreational systems have been described.

Scientific novelty: features and ways of optimization of city recreational environment have been determined.

Practical implications: research results can be used both for the educational process of tourist specialists and for planning recreational activity in the capital.

Keywords: recreational potential, recreational public space, recreational environment, landscape-recreational systems.
