Smochko Nataliia Mykhailivna, Candidate of Geographical Sciences, Associate Professor, Mukachevo State University, Mukachevo, Ukraine, e-mail: natazak@ukr.net , <http://orcid.org/000-0002-2440-5737>

CLASSIFICATION OF INFLUENCE FACTORS ON THE FORMATION OF TERRITORIAL SYSTEM MONODEVELOPMENT

The purpose of this work is a theoretical study of a factor group influencing the formation of mono-development in socio-geographical systems, in particular the classification of factors

according to the following criteria: degree of influence, nature of influence, level of influence and the impact of globalization on all groups.

Methods. The study used general scientific methods, including analysis, scientific synthesis, analytical method, methods of comparison and generalization.

The scientific novelty is that the article identifies different groups of factors of monodevelopment in territorial systems, which should be understood as a set of reasons for the formation of its unique properties, connections, relationships and driving forces of functioning, transformation in modern geospace. It has been revealed that objective factors of territorial system monodevelopment act as system-forming factors and directly influence the level of viability and viability of monosystem and its subsystems, determine differences of preconditions of monodevelopment of territorial system. It is manifested in territorial-component and territorial-functional aspects on the socio-economic, natural resource and demographic potentials of the territorial system.

Practical meaning. The results of this study are the basis for scientific and theoretical research of the territorial system of monodevelopment, the methodological basis for revealing the features of formation, functioning and transformation (improvement, stimulation and regulation) of spatial structures in modern geospatial.

Key words: factors of monodevelopment, preconditions of monodevelopment, territorial organization of society, monodevelopment of territorial systems.
