[Olishevskaya Y.A. The importance of the discipline «fundamentals of local lore» for the training of the specialists in of recreational geography](#)

*The definition of regional studies for training specialist of recreational geography. Designed a basic directions study of recreational regions of Ukraine in the educational course on professions «Tourism and recreation».*

*Keywords: local lore, recreational geography, tourist-regional activity, tourism.*

## **II. REGIONAL AND HUMAN GEOGRAPHY: TOPICAL ISSUES**

[Shukanov P.V., Logvin M.M. Globalizational processes and the development of postindustrial society](#)

*The complex universal are considered and regionally spatial approaches for determination of globalization. Civilization-historical conformities to the law and pre-conditions of global transformation of antroposphere are taken into account. Intercommunication is certain between globalizational processes and postindustrial stage of development of society.*

*Keywords: globalization, standardization, economization, civilization, postindustrial society, antroposphere.*

**[Kurach T.M. Determination of the complex of signs of the classification of the geographical maps](#)**

*One of component staples of classification is classification signs. A selection and research of signs of classification of the maps based on components determine the future classification groups of maps on different signs.*

*Keywords: signs of classification, component of map, classification of geographical maps.*

**[Tkachenko G.V. Map support in tourist activities](#)**

*In this article under discussion to practicability of the cartographic accompaniment of tourist activity, as well as existing types of the maps and modern technology of cartographic presentations of information.*

Key words: cartographic support, tourist activities, tourist information

**[Ridevsky G.V. The territorial structure of the settlement, economy and management of natural resources in modern Belarus](#)**

*Territorial structures of settlement, economy and management of natural resources of modern Belarus namely social-ecological-economic regions are considered. Basic processes of transformation of the regions such as regionopolisation and its particular manifestations including metropolisation and agropolisation are described. The regionopolisation processes are noted to transform the territorial structure on both a subnational level and the intraregional one resulting in space stratification by socio-economic, demographic and ecological parameters.*

[Oliynik Y.B. Golub G.S. The u rbanization of Volyn region : historical analysis and contemporary features in terms of the population 's activity](#)

*The article based on the process of the population of Volyn region – urbanization is the example, as the main indicator of quality of life. Made a historical analysis of the formation of the urban population, and this assessment of modern processes of urbanization in the region. Highlighted urban lifestyle, as a special type of the population and the conditions of humancomfort. Reviewed and analyzed the performance of household equipment of the population of Volyn region amenities.*

*Keywords: urbanization, vital functions of population, urban lifestyle, housing and utilities.*

[Shmatok O.V. Agrologistics in Ukraine](#)

*Agrologistik - one of the industries most dynamic in Western Europe. In Ukraine, agrologistik, in contrast to the overall transport logistics, the initial stage of its development, but it is a very promising direction. Development of agrologistik will bring the country's agriculture to a new level.*

*Key words: agrologistics, transportat, agricultural holdings, logistics experience, agriculture.*

[Oliinyk S. L. The theoretical bases of the self-organizing of the population in Ukraine](#)

*Theoretical bases of self-organizing of the population in Ukraine are considered as socially – geographical concepts that promote improvement of a level of development of region and granting of base social services. Process of self-organizing of the population is defined as a*

*Oliynik Y.B., Lukyanchuk O.M.* . The level of the housing fund of Zhytomyr region

**Keywords:** *housing fund, housing, commissioning of housing, level of housing fund.*

***Sheglov O . V .* Conception of the Guide Scheme of the Historical Monuments of Kyiv**

*Key words: historical monuments, tourist guide scheme, electronic guide.*

## 14 / 19

**Vorovka V.P. Windenergetic potential evaluation of north-western Azov sea territories**

*The issue discusses windenergetic potential valuation of north-western near Azov sea territories based on common long standing data about predominating directions and speed of wind during the year, seasons and the day. The conclusion about opportunity and necessity of windenergetic potential using is made.*

**Martyanova I.A., Lazarev O.E. The regularities of temperature mode changes according to the data of the meteorological station Vishny Volochek**

*The analysis of the intra-and inter-annual temperature mode changes according to data meteorological station Vishny Volochek Tver region for the entire observation period from the end of the XIX century to the present is presented in the article. Clarifying information on annual and monthly values of temperature was made. Particular attention was given to the allocation of a trend component, its mathematical description and explanation. It is presented the comparative analysis with the temperature mode in Russia, the Northern Hemisphere and the Globe as a whole.*

**Tuz Y.V. Long-term seasonal changes i then air temperatures in Ukraine**

*Changes in air temperature during 1951 – 2009, according to individual stations in Ukraine in the context of global climate change are analyzed in this paper.*

*The dynamics of change in average temperatures over the period 1951-2009 was described. The basic patterns of distribution of average temperature trends in*

*Ukraine  
were revealed.*

*Key words: climate of Ukraine, global warming, average temperatures.*

[Galik O.I., Yakovishina M.S. The analysis of the homogeneity of the rows of annual flow in connection with the changes of climate exemplified by the rivers of the Polisky and Western hydrological area of Ukraine](#)

*Homogeneity of rows of annual flow was estimated after self-reactance and non-parametric statistical criteria with the use of different integral mass curves.*

*Key words: annual flow, self-reactance and non-parametric statistical criteria.*

[Penderetskyi O.V. Environmental management and environmental risk management in Carpathian social and geographical area](#)

*Substantiated and proposed solution to the problem of forming an effective organizational and economic mechanism of nature management and environmental risk in the Carpathian social and geographic area. The main causes of environmental risks is a manufacturing activity. As a subsystem of environmental risk management proposed to use methods and tools of environmental management and environmental insurance.*

*Keywords: production, ecology, nature, risks, tourism, insurance and evaluation.*

[Enikova V.F. The monitoring of the ecological conditions of the rivers of Slutsk region by the method of biological indication](#)

*The «School Academy of Science», which unites all interested persons with the purpose of improving skills in certain branches of knowledge and forms the research skills and abilities, operates in the oldest educational establishment of the Republic of Belarus - Gymnasium № 1 in Slutsk since 1999. Within the framework of SAoS a monitoring research of environmental condition of surface waters in Slutsk region has been carried out.*

*The conclusions on the hydrochemical and hydrobiological characteristics of the river Sluch and its side streams were made and changes in the ecological state of water bodies of Slutsk region during the period of observation were assessed.*

*It was revealed that the river Sluch and its side streams within the study area are in different ecological conditions. The rivers Sluch and Bychok are most polluted within the city, Veseyka and Lokneya rivers are cleaner. Monitoring researches of ecological state of rivers in Slutsk region are going on.*

**[Basyuk T.O. The prognostication of the reforming of the banks of Braclavske storage pool is under the conditions of the increase of water level](#)**

*An estimation and prognostication of development processes of re-forming of banks Braclavskogo of storage pool the hydroenergetic setting is executed on condition of his reconstruction and raising of water level to the project mark. Offered to recommendation in relation to defence of separate areas storage pool from podtopleniya of off-shore territories.*

*Key words: re-forming of banks, Braclavskogo of storage pool, off-shore territories.*

**[Gromyk O.M. The content of radionuclides in the soils of Western Polesia](#)**

*(exemplified by Manevychi and Lyubeshiv administrative districts)*

*The content of radionuclides in soils of Western Polesie . It is shown the density of contamination of soils*

and  
plants in the  
towns  
of Volyn region.  
Found that  
the maximum  
contamination  
soils  
were  
sod-  
podzolic  
sandy in the  
Manev  
ychi  
area  
and  
peat  
-  
bog  
and  
peat  
in  
the  
Lubeshiv  
area.

*Keywords: contamination, soil, vegetation, settlement.*

**[Mazibora O.V. The geochemical characteristics of the floodplain soils of some stages of the subboreal period of the holocene in the basin of the Southern Bug](#)**

*The features of floodplain soil formations of different stages of pedogenesis in subboreal period of Holocene in the forest-steppe zone of the Southern Bug basin were considered. The content of carbonates and organic compounds in soils, which belong to different stages of soil formation, was investigated. The regularities of the allocation of heavy metals in humus horizons were reviewed, also correlation of this index with the concentration of humus and carbonate compounds was revealed. The conclusions about the features of pedogenesis in some stages of subboreal period of Holocene were made.*

*Key words: Holocene, soils, evolution, heavy metals, humus.*

**[Plaskalnyi V.V. The creation and usage of the elements of the spatial database «Black Sea Biosphere Reserve»](#)**

*The article presents important arguments for the necessity of use of geographical information systems and technologies in environmental affairs and highlights for the main methodological aspects of the designing and use of spatial database elements of Black Sea Biosphere Reserve.*

**[Timofiychuk N.M. The structural and geographical principles of the research of the usage of nature within mountainous areals](#)**

*The article analyzes the approaches to the interpretation of the term «natural» aspects of his study of various disciplines, and the main tasks that need to be explored during the design and geographical study of the mountainous territory in order to optimize natural resources.*

*Key words: nature, natural resources, optimization of natural resources.*
