*THE USE OF TOURIST-RECREATIONAL RESOURCES IN THE CONTEXT OF
DECENTRALIZATION (ON THE EXAMPLE OF THE POBUZKA UNITED TERRITORIAL
COMMUNITY)*

The purpose of the article is to explanation the possibilities of the using resources for the development of tourism in the Pobuzka united territorial community in the context of the sustainable development of the territory in the context of the Ukraine's administrative reform. It will make the satisfaction the needs for people in the rest and recovery human strength.

Methods of study include the use of a systematic approach, descriptive, source study and comparative geographical methods.

Results. The available resources for the development of tourism in the Pobuzka united territorial community in the process of decentralization are analyzed. The features of the specific resource's components for local tourism as one of the sources of income to the community budget were disclosed. The strategy of sustainable development and creation of conditions for the possibility of local self-government independently solve problems of local importance at their own expense was taken into account. Tourism in this area should be focused more on residents of the future community and neighboring settlements.

Scientific novelty consists in analysis of the features of rational use the available resources for the development of tourism at the separate territorial community level in the context of the decentralization process.

The practical significance of the study is to use the results in creating a strategy and a long-term plan for the development of a community.

Keywords: administrative reform, recreational resources, sustainable development of the territory, Pobuzka united territorial community, rest and recuperation.
